Education

Ballari Institute of Technology and Management

Expected 2028

B.E. in Electronics and Communication Engineering (3rd Year) – CGPA: 8.73

SRI GURU PU COLLEGE

PU/ 12th(PCMB)

Percentage : 90.3%

TMAE'S DAV Public School, Kamalapur

SSLC/ 10th

Percentage : 72%

Technical Skills

Programming Languages: Python, C/C++

Tools & Platforms: MATLAB, Arduino IDE, Arduino UNO

Domain Expertise: Embedded Systems, Sensor Technology, Circuit Design, Computer Vision, Automation and Control Systems

Projects

Automatic Rain Detection Sensor

- Designed and built an automatic rain detection system that senses rainfall and triggers a connected device without manual intervention.
- Interfaced a rain sensor with an Arduino Uno microcontroller to process real-time sensor data and control relay-driven outputs (wiper, buzzer, LED).
- Implemented embedded logic in C/C++ to reliably detect water presence and automatically activate the appropriate output device.
- Achieved consistent, real-time activation of the connected device upon rainfall detection, demonstrating a functional automation pipeline from sensor to actuator.

Smart Object Detection using Arduino UNO

- Developed an embedded object detection system using an Arduino Uno (ATmega328P) paired with an ultrasonic sensor (HC-SR04) for real-time distance sensing.
- Programmed sensor-to-output logic in C/C++ (Arduino IDE) to trigger a buzzer, LED, or motor when an object was detected within a predefined range.
- Applied GPIO-based digital I/O and circuit design principles to build a low-cost prototype suited for obstacle detection, parking assistance, and security applications.
- Achieved 95-98% detection accuracy with a response time under 1 second, delivering reliable realtime alerts and automation.

Certifications

- AI Tools and ChatGPT Workshop – Gained knowledge of AI fundamentals and applied AI tools for content creation and problem-solving
- Infosys Springboard – Email Writing and Communication to Succeed
- Infosys Springboard – Programming in C
- Infosys Springboard – Interactive Skills
- MathWorks – Control Systems Modeling Essentials (MATLAB)
- MathWorks – MATLAB Onramp (self-paced training)
